

DVB-T USB Stick

~PCTV Micro DVB-T USB Stick~

This PCTV Micro DVB-T USB Stick is a gem of a USB DVB-T tuner. It picks up digital TV even if the signal is weak, thanks to its ultrasensitive reception technology. The incredibly nano-size design makes it the perfect match for today's thin laptops and compact desktops. Presto!PVR software included. You can enjoy TV in full-screen mode or in a scaleable window while using other applications.

System Requirements

- I Microsoft® Windows® Vista (32 bit/64bit) or Windows XP with latest Service Pack

*Please read the Guide and Install the software before connect the PCTV Micro DVB-T USB Stick to your computer.

*Put the antenna horizontally position against the metal surface to get a better reception.

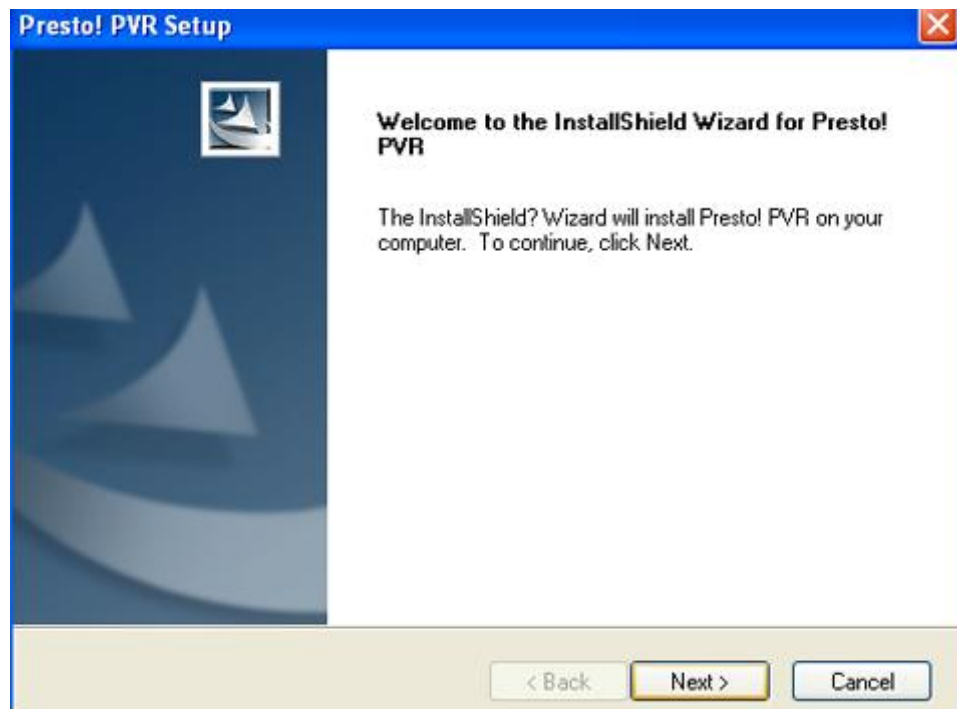

Insert the disk drive installation CD

- (1). Insert the "CD disk" into your CD Drive.
Select the option "Install Software" and click "Next".

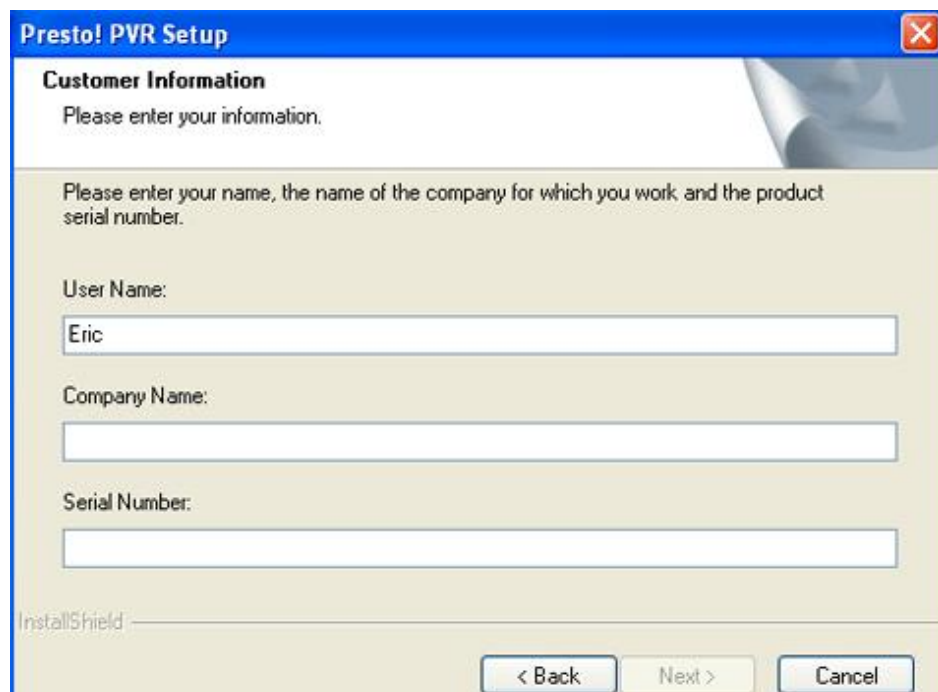

- (2). Select your install language and click "Next" to continue.

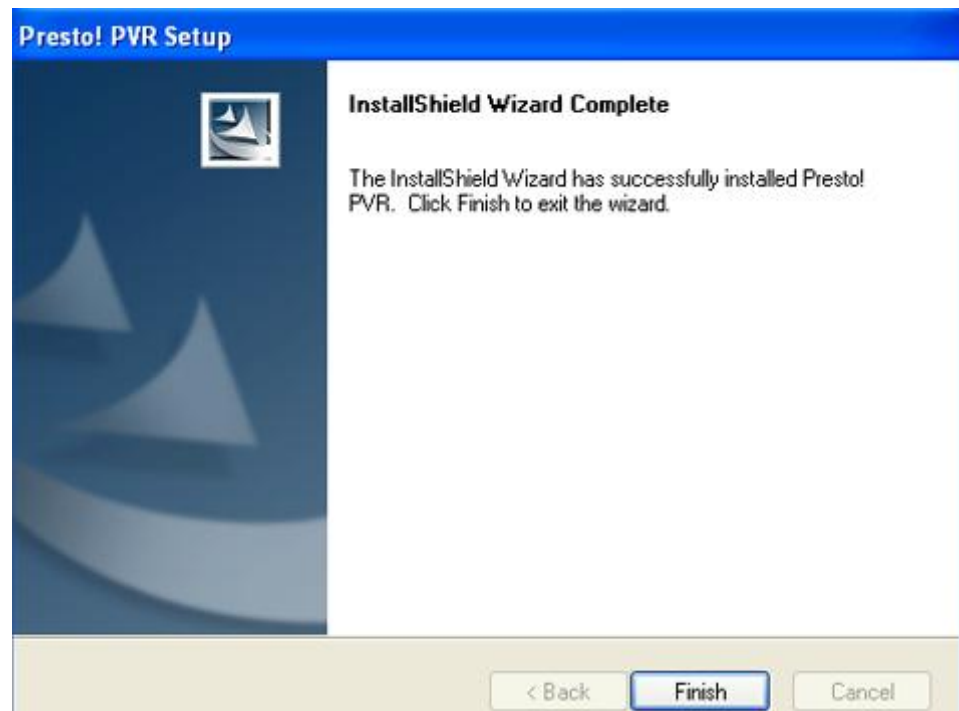

(3) Enter information and "Serial Number" for the CD's cover. click on "Next>" to continue.

The image shows the 'Presto! PVR Setup' window at the 'Customer Information' step. The title bar is blue with the text 'Presto! PVR Setup' and a close button. The main area has a light beige background. The text reads: 'Customer Information' and 'Please enter your information.' Below this, it says: 'Please enter your name, the name of the company for which you work, and the product serial number.' There are three input fields: 'User Name:' with the text 'Eric', 'Company Name:', and 'Serial Number:'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

(4) Presto!PVR , the installation is complete when you click on "Finish".

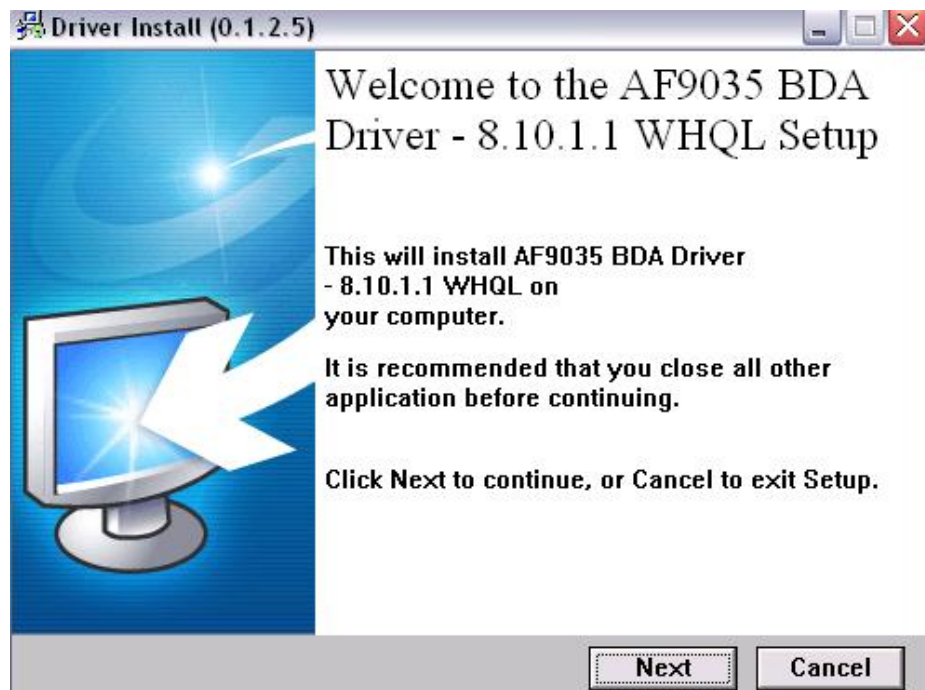

Driver Installation

(5) Now install the driver files to your computer.
Click on the "Driver".

(6). Click "Next" to continue Driver installation.

(7). Click "Finish" to finish the driver installation.

(8). Congratulations! The software and hardware are installed successfully.

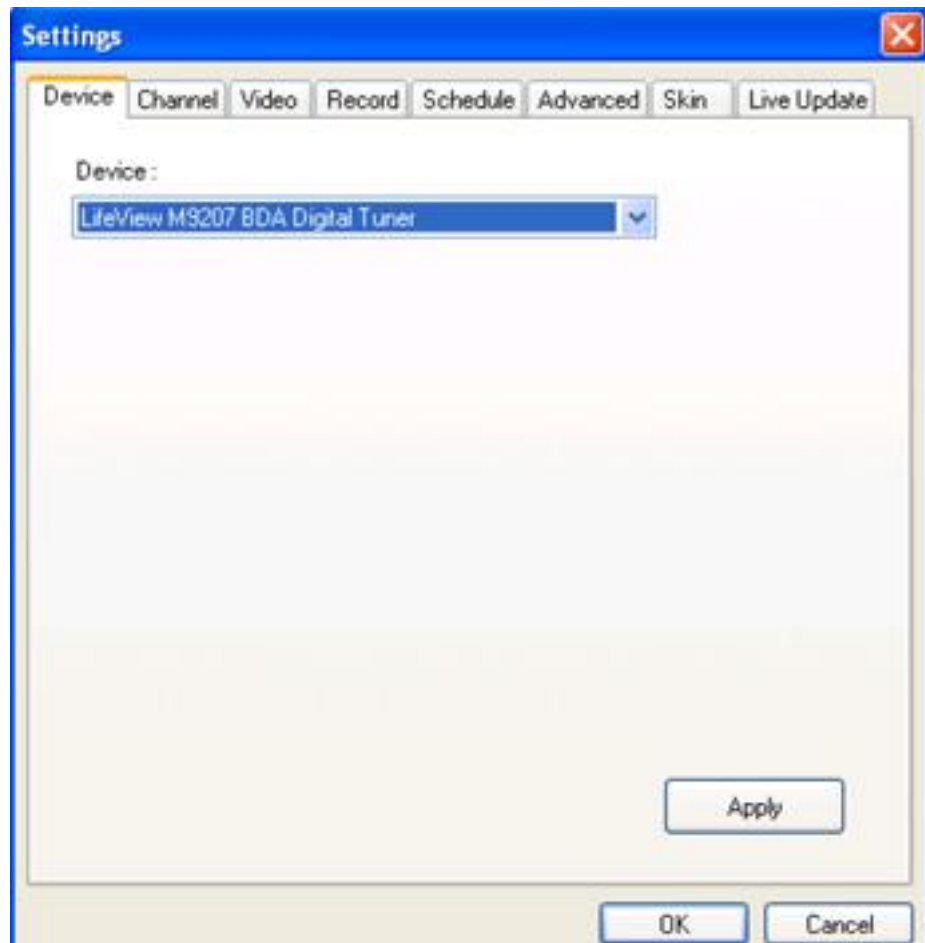

(9)Click on the "Presto!PVR" to start the program.
Make sure that the antenna is securely attached to the device.
Insert the antenna horizontally to the metal surface to reach better reception.

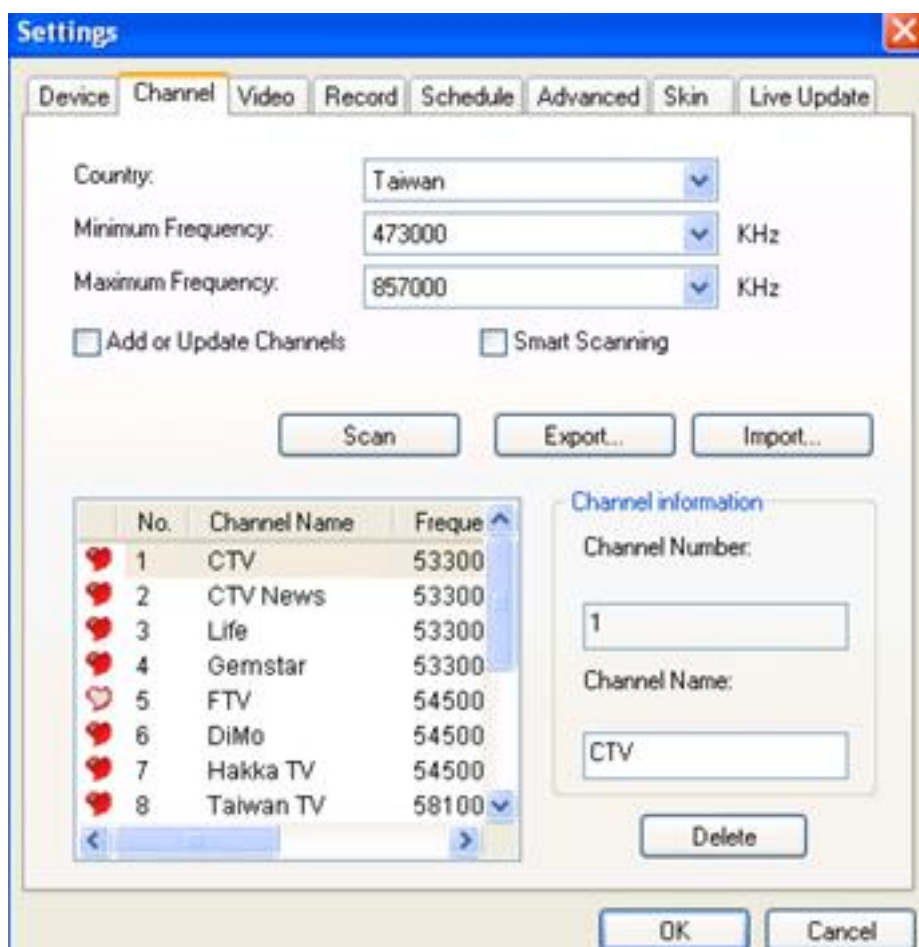

(10). Use automatic channel search to find the channels.

(11) Choose a device from the Device list.

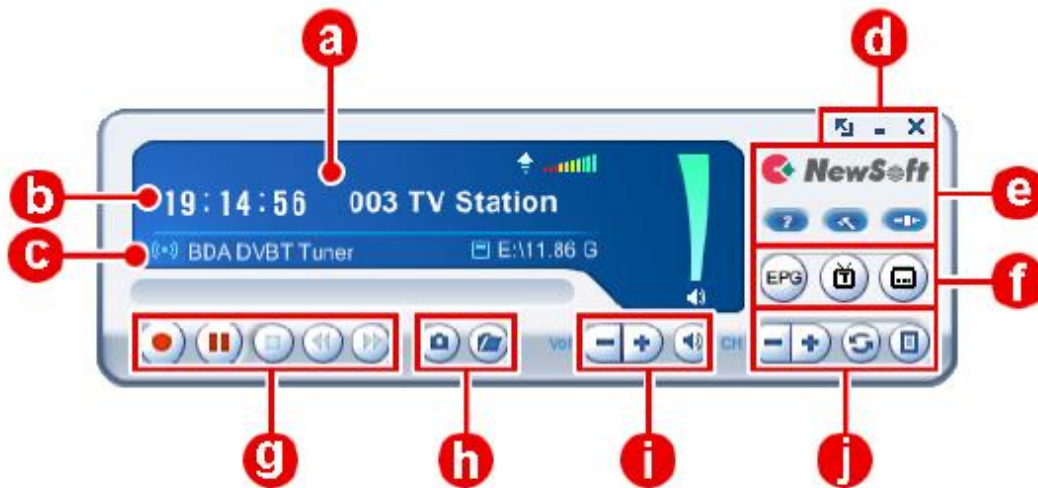

(12). Click the **Channel** tab on the **Settings** dialog box, and then click **Scan** or **Auto Scan** to search for channels. If a channel is found, it will be included in the channel list. When finished, you can choose a channel and change its name. You can also scan for changes by selecting **Add or Update Channels**, or use the **Minimum Frequency** and **Maximum Frequency** boxes to limit the frequency range to be scanned. Other options include importing and exporting channels lists. You can remove selected channels by clicking the **Delete** button.

(13). Click **Ok** to close the **Settings** dialog box and watch some TV.

User Interface

a	Across the top of the presentation area will be listed the program status (Time shifting, Recording, Playing, Forward, Backward, and the program name) as well as the signal quality.  (1) The program status will only appear when playing, recording, or time shifting. (2) The signal quality will only be shown when the source is Digital TV.
b	List the time along with the channel number and name.
c	Display the currently connected adapter and how much free space is available for recording.
d	These are the buttons for controlling the program. There are full screen, minimize and close
e	Click the NewSoft logo to connect to our website. Also available is the help file, the settings button, and a button for selecting the input source.

f	These are special feature buttons. EPG (for Digital TV), Teletext (for DVB-T and PAL Analog TV), and Closed Captions (for ATSC and NTSC Analog TV) / Subtitles (for DVB-T). EPG is available for Digital TV only.
g	The program control buttons are used for recording programs and watching the programs that have already been recorded.
h	Click to capture screen at that moment and check the programs that have already been recorded
i	The volume controls let you turn it up and down as well as off. There is also an indication of the current volume level.
j	These buttons are for choosing a channel to watch on TV. Either by going up or down a channel, going back to the previously viewed channel, or choosing from the channel list.
